DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 9 recites the limitation "said reactive chamber" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim 17 recites the limitation "said loudspeaker diaphragm" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 9 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakamoto (U.S. 4,772,513).

Regarding claims 9 and 17, Sakamoto teaches a diaphragm for a loudspeaker manufactured in accordance with the steps of heating a molded resin speaker diaphragm (2, 71, col. 7, lines 11- 17, lines 50-51 and col. 8, lines 23-25) in a reactive chamber (1, figure 1), and activating the surface of the diaphragm by applying plasma (figure 1) while keeping the temperature inside the reactive chamber below a heat deformation temperature of the diaphragm (col. 7, lines 18-19 and lines 32-34).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamoto et al. (U.S. patent 4,772,513).

Regarding claim 10, Sakamoto does not specifically teach isocyanate primer that is applied after plasma treatment. However, it is known in the art to provide isocyanate for a coating or bonding agent through or after plasma treatment.

Therefore, it would have been obvious to one skilled in the art to provide isocyanate agents after plasma treatment in Sakamoto for providing a useful laminating adhesive and enhancing the bonding or adhesion.

Regarding claims 11-12, Sakamoto does not specifically teach the material for the diaphragm as claimed. However, Sakamoto does not restrict to any material for the diaphragm. Therefore, it would have been obvious to one skilled in the art to provide any resin or plastic material for the diaphragm of Sakamoto such as polyethylene or polypropylene for an alternate choice.

Allowable Subject Matter

6. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sato et al. (U.S. patent 6,627,140) teaches a method for manufacturing diaphragm for a loudspeaker.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUYEN D. LE whose telephone number is (571) 272-7502. The examiner can normally be reached on 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, SINH TRAN can be reached on (571) 272-7564. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
